

TWICE THE DISCOVERIES, TWICE THE FUN!

At Camp Invention®, we bring hands-on STEM experiences led by local, qualified educators to children across the country. This summer, double up with TWO WEEKS of open-ended challenges designed to build confidence, spark imagination and create lasting friendships.

WEEK 1: DISCOVER

Young innovators will:

- Unleash nature-inspired creativity to make their own claw machines with unique prizes
- Make moving props while exploring special effects and optical illusions in movies, art and animation
- Navigate the ultimate road trip with a custom control panel and help from GPS and AI
- Investigate Antarctica with a robotic assistant and propel plush penguins across snowy landscapes

WEEK 2: WONDER

Young innovators will:

- Explore physics, design engineering and art by building their own mini skate park with ramps and rails
- Become confident event planners who engineer light-up party hats and invent a robotic party assistant
- Transform their own robot into an animatronic stuffie and learn to protect their intellectual property
- Launch their own pop-up business by using innovative entrepreneurship skills and creative strategies
